Sire's Name _____	Reg. # _____	UC- Davis VGL # _____
Dam's Name _____	Reg. # _____	UC-Davis VGL # _____

Owner's Signature \_\_\_\_\_ Date \_\_\_\_\_

*When pulling hair samples (DNA samples) take care to obtain 20-30 hair FOLLICLES (hair roots). This is very important! Coarse, longer hair found over withers, chest, rump, tail or back of hind leg is the preferred sample type. Needle-nosed pliers work well for this job. Hair sample must be sealed inside a 3.5" x 6.5" paper envelope. Do not use plastic bags. Put goat's name and eartag number on the outside of the envelope. Allow 4-6 weeks for processing of DNA requests.*

**Mail the DNA sample, this DNA Request form, the goat's original ASR Registration Certificate and the DNA testing fee of \$35 to American Savanna Registry, 457 Hankins Road, Sarah MS 38665.**

**Please include a completed Order Form.**
